Crystal clear water the easy way

What is the latest and greatest arsenal in pool cleaning equipment? Its simple, it's called the Clean and Clear Plus Cartridge Filter.

Pentair Water Australia is proud to announce the release of its new Onga Clean & Clear® Plus Cartridge Filters.

Corrosion resistant, featuring an injection moulded filter tank that provides superior strength and reliability, the cartridge filter assembly uses four easy to clean, non-woven, polyester cartridges. Each filter is supplied with a bulkhead union set for easy installation.

Clean & Clear® Plus cartridge filter combines top-end filter performance with low maintenance. This dependable design uses special filter elements to strip tiny particles from your pool water...particles as small as 30 microns.

Our four-cartridge design provides maximum filter surface area to capture more dirt and extend time between cleaning. And cleaning is a snap. Open the top, remove the cartridges, hose them off, and Clean & Clear Plus is ready to go again.

We've maximized cartridge surface consistency to block and trap the maximum amount of solids, plus we use the most durable materials to extend cartridge life.

Clean & Clear Plus delivers commercial-grade performance that keeps pools clean and sparkling, day in and day out. Please contact your local Onga representative today on 1300 137 344 or visit the website www.onga.com.au or for any further information please contact me below.
